

QUICK ODOR REMOVAL

Fast control of air pollution.

Rapid removal of bacteria

+

Rapid virus removal

Quick formaldehyde removal

+

Quickly remove TVOC

Disinfection equipment	Spray bottle
Water proportion	500~1000ml (10 capsules)
Applicable space	100~300m ³
Disinfection method	Put in a spray bottle, spray disinfectant, and put it into the machine to participate in air circulation for purification and disinfection

Inorganic Air Disinfectant: Made from natural inorganic salts that undergoes activating. Upon contact with water, reaction occurs, producing a large number of high-energy ion groups, such as CO_3^- and OH^- . It can instantly mineralize and decompose harmful gases in the air, including HCHO , C_6H_6 , NH_3 , O_3 , SO_2 , C_2O_2 , N_2O , T-VOC . Additionally, it effectively kills coronaviruses, coli, staphylococcus aureus, Streptococcus pneumoniae, H1N1 and more. Furthermore, it reduces itself to stable inorganic substances, posing no impact on the environment, making it a safe, efficient, low-carbon, and eco-friendly disinfectant product.

Hospital sterilization

Bathroom sterilization

Pet deodorization

Remove oil fumes

Water Gated·Air Health Technology.
